

 CUT-UP SOLUTIONS

foodmate
Poultry Processing Systems

Our mission is to innovate, automate and bring cost-effective solutions to the industry.

Cut-up Solutions

Foodmate offers a complete range of Cut-Up Solutions

Leading Technology in Cut-Up Solutions | Catered to our clients' specific needs, solutions range from a self contained frame type cut-up system, to sophisticated computer and vision camera controlled flexible cut-up systems that can deliver product to any desired location inside your cut-up area. Foodmate provides solutions to meet the widest range of products specifications and cutting requirements, meeting the highest standards set by retailers, fast food companies and institutional organizations from around the world.

Compact Cut-up System

The Foodmate Compact Cut-up System is characterized by its self-contained design and is delivered prewired with a control panel that is already mounted to the machine. System is very easy to install and only requires one main power connection. In order to minimize downtime and maintenance costs, all Foodmate Compact Cut-up Systems are equipped with Foodmate auto-correcting Magnetic Shackles.

Our Compact Cut-up Systems are available in different configurations, designed to meet variable product mixes. Some systems are as simple as just dropping front halves and cutting leg quarters, while others may include options such as weighing and and whole bird distribution. Line speeds can vary from 80 birds per minute on 12" centers to 140 birds per minute on 8" centers. This system allows for a maximum of 6,000 birds per hour.

Food Service Cut-up System

Food Service Cut-up Systems are designed to meet all 8 and 9-piece cutting requirements set by various fast food chains such as KFC, Popeyes, Church's Chicken and Bojangles'. System can also be designed and customized to meet other food service cut-up requirements, from different countries around the world, such as Korea and Thailand. Foodmate has also supplied lines to make 4 and 6- piece bone in breast cuts, which are used for school lunch programs in the U.S.

All Foodmate Food Service Cut-up Systems are supplied with self-correcting magnetic cut-up shackles to help prevent the shackles from misfeeding when entering the cut-up modules. The unique turning point and side plate configuration makes the machine easy to clean and flexible for future line modifications. The stand-alone system requires minimal installation time because all of the single point connections are integrated into the modules/machines.

Flex Cut-up System

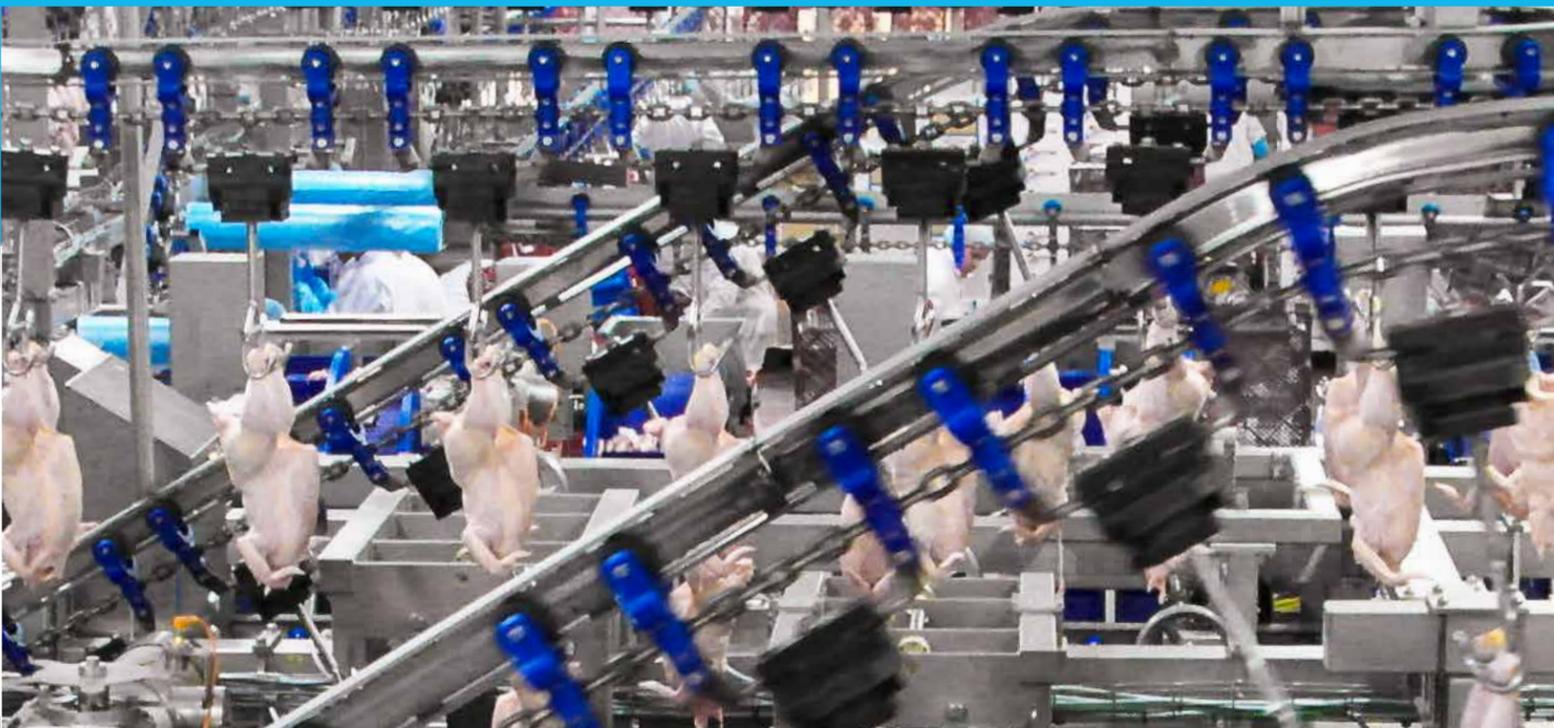

Flexible Cut-Up Systems deliver product to any desired location

Foodmate Flex Cut-up System is one of the market's most advanced cut-up systems, offering excellent efficiency and flexibility. The system combines the advantages of the optimal solution for whole bird distribution based on grade and weight as well the optimal logistic solution to deliver parts to any desired location in the cut-up area. Modules can be customized according to your plants' requirements.

The Flex Cut-up System can distribute birds by weight and/or grade to all the necessary WOG (without giblets) drops or cutting modules; as it pairs with Foodmate | ChickSort Weighing Transfer Machine and InVISION Camera Grading System.

We make it simple.
You make it profitable.

Efficiency and Flexibility.
Cutting up can be this simple.

Compact Cut Up System | self-contained design available in different configurations, designed to meet variable product mixes. Typical Set up includes:
