

WING CUTTER SUPER CUT

WING CUTTER SUPER CUT

Foodmate developed a new high yield wing cutter to better handle large birds, birds with a missing wing, and damaged birds. The machine has a very open design to allow birds with one wing, or damaged birds to easily pass through the machine without clogging the machine and stopping the line. The machine creates an anatomical cut with the option to optimize wing yield by leaving the back meat on the wing.

While designing the machine, a lot of focus was put on making the machine easily adjustable; which resulted in the ability to move the blades in or out for optimal yield and cutting results. An electric height adjustment is a standard feature on this machine. Customers that do not have a Foodmate cut-up system can also benefit from this machine since it can easily be installed on existing lines.

Final Product

Wing with or without scapula meat

ADVANTAGES

OPTIONAL BYPASS

CONSISTENT AND ANATOMICAL CUTS

ACCOMMODATES BIRDS WITH ONE WING

SUITABLE FOR BIG AND SMALL BIRDS

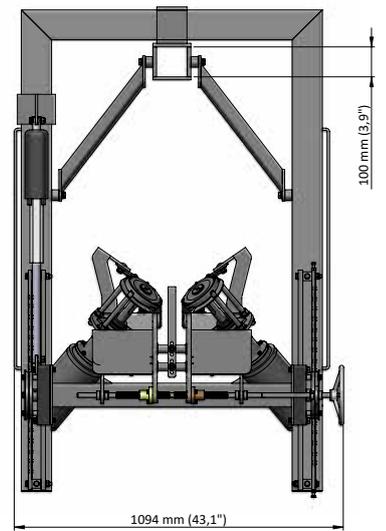

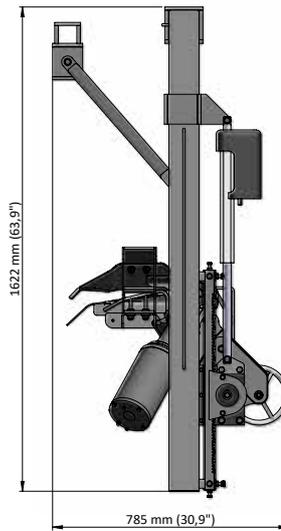

LEAVES MINIMUM BREAST MEAT AND MAXIMUM BACK MEAT

HANDLES DAMAGED BIRDS WITHOUT CLOGGING THE MACHINE AND STOPPING LINE

WING CUTTER SUPER CUT

We make it simple.
You make it profitable.
