BYPRODUCTS

MAX6000 | 6,000 BPH

WHITE MEAT DEBONING | A NEW STANDARD IS SET

The MAX 6000 can operate at a speed of 6,000 caps or whole breasts per hour and only requires a 33' x 5' footprint. In addition, the MAX 6000 has a user friendly and intuitive operating touch-screen panel with pre-programmed product selection.

MAX6000 allows the user to operate two different pre-set programs, such as half fillets or butterflies,

giving you the ability to control production on the fly and saves valuable set up time. The MAX 6000 offers exceptional flexibility with final product options such as butterfly fillets, half fillets, and tenders/inner fillets. All final products display high quality cuts, exceptional yields and presents well for tray packing and many food service applications.

COMPACT | EFFICIENT | FLEXIBLE

ADVANTAGES

- ✓ Flexible final product selection:
 - › Butterfly fillets, half fillets and tenders in/out
- ✓ User friendly operator interface
 - › With loading efficiency rating and batch control
- ✓ Capacity of 6,000 breast caps or whole breasts per hour
- ✓ Exceptional yield and final product presentation
- ✓ Touch-screen display panel with pre-programmed product selection
 - › Dual programming option
- ✓ Integrated automatic skinning unit and wishbone remover

MAXIMA | 3,000 BPH

The Maxima Breast Cap Deboner is designed to automatically deskin the breast and remove the wishbone with minimal bone content and high yields. The Maxima has a small footprint and can produce up to 50 breast caps per minute with minimal loading, inspection and trimming staff.

Deboning white meat does not have to be a labor intensive and inefficient process. And it should not require a large footprint, or be expensive to maintain. You can eliminate all the above challenges with the Foodmate Maxima Breast Cap Deboner. The machine has a built-in PLC controlled technology to automatically skin the breast cap and remove the wishbone with minimal bone content and high yields. Maxima produces single fillets, presents well for tray packing and is suitable for many food service applications.

ADVANTAGES

- ✓ Reduces labor cost
- ✓ Produces half fillets
- ✓ Consistent and high yield
- ✓ Integrated deskinner unit
- ✓ Compact design and small footprint
- ✓ Automatic wishbone remover
- ✓ Low total cost of ownership (TCO)
- ✓ Minimal bone content and rework
- ✓ Debones up to 3,000 breast caps per hour
- ✓ PLC Controlled with simple HMI touch screen

PRODUCT SELECTION

Final product presents well for tray packing and is suitable for many food service applications.

SEMI AUTOMATIC BREAST CAP DEBONER | 1,400 - 2,400 BPH

The Semi Automatic Breast Cap Deboner is utilized as a skinning unit, blister remover, and precut device for whole fillets (butterfly) or half fillets. It contains a raised construction for installation of a belt conveyor underneath the machine. This deboner is suitable for breasts without backbone, with or without skin. It is composed of stainless steel and food approved nylon, and has a stainless steel frame and motors.

PRODUCT SELECTION

FM 7.50 | 3,000 BPH

The FM 7.50 Breast Cap Deboning Machine debones up to 3,000 breast caps per hour. The machine produces single, as well as butterfly fillets and features an automatic skinning and blister remover device. The breast cap deboner is easy to operate and can be loaded manually by one or two people. Its design allows for adding a transport belt under the machine. It requires minimal floor space and is easily moved.

PRODUCT SELECTION

We make it SIMPLE.
You make it PROFITABLE.

Our mission is to innovate, automate, and bring cost effective solutions to our customers.
